

SIRIUS SOFA SYSTEM WORKSHEET

ANTHONY GUERREE

Named after the brightest star in the night sky, Sirius is a contemporary and fully-upholstered modular sofa that provides a space for sharing, working or even a place where meals can be enjoyed. Right angles and curves combine for a flexible and asymmetrical interior landscape. A diverse selection of modules allows for numerous possible configurations.

DEFINING YOUR CONFIGURATION

You can create your desired configuration using one of the following methods:

COMMON CONFIGURATIONS

Find common configurations on pages 2-5. Each configuration can be ordered as drawn.

A LA CARTE

Define your own configuration using individual modules. Modules, procedures and graph paper can be found on pages 7-14.

COMMON DIMENSIONS

The sofa has a seat height of 41.5cm | 16 1/3" and backrest height of 65.5cm | 25 4/5"

SCATTER CUSHIONS

Scatter cushions are available in two sizes and are included in most pre-defined modules: Modules with backrest E or backrest ZL/ZR come with one medium scatter cushion (W50 × H50 cm | W19 3/4 × H19 3/4 "). Modules with any other back come with one medium (W50 × H50 cm | W19 3/4 × H19 3/4 ") and one small scatter cushion (W50 × H25 cm | W19 3/4 × H9 4/5 "). Ottomans and seats without backrests do not come with scatter cushions. Additional scatter cushions can be ordered separately. Specify these on the Finishing Touches page.

VELCRO CONNECTORS

Velcro connectors will be provided to fix the modules into the configuration ordered.
