TECHNICAL SPECIFICATIONS

PRODUCTION PROCESS  
The Gas Cylinder height-adjustable side table is crafted with precision. The column, made from extruded aluminum, houses the Gas Cylinder responsible for height adjustment. The table base is made from steel, ensuring stability. The tabletop, available in charcoal linoleum or dark stained oak veneer, is CNC milled for precision. For oak veneer tabletops, a sealer is applied for durability. Note that natural materials can result in unique variations, enhancing each piece’s individuality. The table can be adjusted 20 cm.
